

ERECTILE DYSFUNCTION CURED

ERECTILE DYSFUNCTION IS A REALITY.

The former occurs when there is interference in the sexual intercourse and reproduction due to absence of sexual desire and the eminent problem of ejaculation or orgasm; while the latter is a complete or continuing failure to reach an erection or to sustain an erection even for a few seconds.

THE STATISTICS ABOUT ED.

The National of Health statistics revealed that from 15 to 30 million men in the United States have erectile disorder. If the muscular contraction ceases the blood flow by opening the passage, erection is reversed. There is no specific age bracket that can not suffer from erectile dysfunction.

THESE FACTORS ARE RELATED TO ED

Who loves a fat guy? Being overweight has so many unpleasant effects; you will not only look grotesque but will have many physical disorders as well. These drugs may have side effects that disturb the normal sexual activity of the patient. Perennial drug abusers. Continuous bicycling. When you are biking, there is a constant pressure from the bicycle seat which compresses the nerves and blood flow to the penis.

ERECTILE DYSFUNCTION AND OTHER DISEASES.

The relationship of Parkinson Disease and Erectile dysfunction is more likely an imposed nervous system. One-third of men with Parkinson Disease may have experienced impotency in obtaining an erection. Around 60 to 80 percent of men

using alphostadil, papaverine hydrochloride or phentolamine mesylate, has achieved success of an erect penis.

PSYCHOLOGICAL CAUSES.

In various studies made on erectile dysfunction, it was discovered that childhood abuse and trauma of sexual and other strong emotional experience are psychological factors for the dysfunction in adulthood. Depression is both physical and psychological and these depressants used as drugs may magnify the problem. He begins to feel moody, irritable and impatient.

TREATMENT AND CURES
